

HVAC Specialist I

The home office of Protective Life Corporation in Birmingham, Alabama has an opening for an experienced HVAC professional. The HVAC Specialist I will ensure that HVAC, plumbing, and other related equipment is operating properly. Responsibilities will include:

- Plumbing repairs to restrooms
- HVAC repairs
- Assist in test, repair, and upkeep of cooling towers including water treatment and conservation for the buildings.
- Adjust and balance HVAC system using automated controls.
- Serve as backup to Plant Maintenance Engineer for emergency response for HVAC, mechanical, electrical, and plumbing concerns during business day and after hours.

Two years of industry technical training and a high school education plus five years experience in installation, repair, and preventative maintenance on heating, cooling, and plumbing systems within office facilities are required. Certification in use of refrigerants and reclaim-recycle equipment is preferred. The ability to service, repairs, and adjust electronic and pneumatic controls and sensors normally associated with HVAC and plumbing systems is needed. Must be familiar with and able to test water chemical treatment for cooling towers and enclosed water systems. Excellent customer service skills are required.
